ILS World incorporates and administers companies in more than 40 of the world's most reputable jurisdictions. Whether your world is onshore, offshore or both, our company formation and management services are far-reaching and accommodate your objectives with confidentiality, greater tax efficiency and cost effectiveness.

Trading structures

With decades of experience working across borders, ILS World is the clear choice for international trading structures which create opportunities for significant trading taxation reductions. Once generated, profits can be remitted to a low tax destination through the use of suitable holding or tax transparent entities, which are well regulated and adhere to the latest international information exchange agreements.

Bank account opening

It has become increasingly difficult to open a bank account. As well as becoming more risk adverse banks are unwilling to advance facilities where they see little chance of making money from the service they provide.

Across the ILS World group we have developed relationships with many banks and are able to open both corporate and personal accounts for our clients. This includes the ability to provide facilities in specialist sectors as well as activities, jurisdictions, entities and individuals that may have been deemed high risk.

Accounting

Today it is essential all companies maintain proper accounting records to adhere to international compliance standards. We provide the full range of accounting services from statutory account preparation and management to tailored invoicing by our experienced and skilled team.

Consultancy

ILS World's highly qualified and experienced professionals provide business advice in the jurisdiction best suited to your needs. Our consultancy services are innovative, incisive and consistent wherever you do business.
